

**QUALITY, INNOVATION, ENVIRONMENTAL MANAGEMENT AND  
OCCUPATIONAL HEALTH AND SAFETY**

The Management Committee of SOCOTEC SPAIN considers that quality, innovation, respect for the environment and occupational health and safety are the strategic elements on which the development of all its activities and processes should be based.

Therefore, with the aim of integrating all of them into the culture of the organization, it establishes this policy, in which it defines the following reference elements:

Provide the Client's satisfaction

- a. To be a benchmark in the market in the provision of optimal and valuable solutions in Engineering and Quality Control,
- b. Adopt knowledge and experience as a reference for the development of their activity within the framework of contemporary social, technical and environmental values ,
- c. Always conduct activities with respect for the environment, establishing measures for its protection and carrying out the protection of environmental impacts and the prevention of pollution,
- d. Establish a culture of innovation in all activities, with the challenge of incorporating new technologies into the final product, promoting digital transformation and respect for the environment,
- e. Provide safe and healthy working conditions that include management to eliminate hazards and reduce risks for the prevention of injury and deterioration of health, in compliance with legal requirements , with a commitment to worker consultation and participation tags.
- f. To develop all this with the utmost regulatory rigor and independence to promote Corporate Social Responsibility and Sustainability.

By virtue of this, it undertakes to establish and comply with the applicable legal requirements, as well as the requirements established by standards ISO 9001, UNE166002, 1801 4 001 and ISO 45001, providing for a complete organizational structure for the Scope of Drafting, supervision, construction management, control, management and technical assistance of civil engineering and architectural projects. Auscultation and geotechnical studies. Quality control and carrying out tests and inspections on structures, infrastructures, architecture and installations. Measurement of thickness in naval structure (UTM). Consulting and technical assistance in Innovation, Environment and Energy.

The Management has set up the *Integrated Management System Committee* as the operational representative of the quality, innovation, environmental management and occupational health and safety policy , giving it the responsibility and authority to identify and to reveal the problems inherent in these concepts, and to be able to take the necessary actions to solve them and verify their results and to implement continuous improvement in the organization.
